

SUBMISSION TO TGA RE HOMOEOPATHIC MEDICINE

I support:

Option 1 - Keep homeopathy regulated the way it is.

It is very disappointing that an entity such as TGA, which is intended to be impartial and independent, is displaying incredible bias in accepting only negative research views on homeopathy while at the same time ignoring other research clearly indicating positive outcomes from using homeopathic medicines, research which has been accepted by other countries as valid and accurate.

It would be good to see the TGA being fair, equitable and honest in its assessment of homeopathy. Homeopathy has been around over 200 years and has an excellent reputation in many countries world-wide. It is in fact one of the most thoroughly researched medicine systems in existence and is one of the very few systems of medicine that is completely safe.

We should be embracing homeopathy - proven effective, safe and economical!
