

As an individual who has observed personal beneficial health results with absolutely no side-effects from receiving homeopathy, on and off since the 80's and regularly for the past two years, I wish to express my support for Option 1 of the four regulatory options for 'Consultation: Options for the future regulation of 'low risk' products' that is presently under consideration.

My understanding is that the TGA's role is to protect public safety, not to restrict access to products that in my own experience are completely safe: Products that I wish to maintain the right to freely choose to use, as therapeutic goods and services.

In order to protect my right to access homeopathy, I strongly oppose Options 3 and 4.

Sincerely,

Alison Lee Cousland.
