

Submission to the TGA

I want option 1 to stand and totally disapprove of option 3 and 4.

I oppose to the possibility of Homeopathy being banned as there is no evidence of it doing any harm.

I know first hand of many many happy healthy customers from using Homeopathy due to myself working in a Homeopathy office.

The Government are not doing anybody any favours by stirring up trouble when they obviously haven't even tried Homeopathy for themselves.

We as consumers have every right to take what we like especially when it is completely harmless such as Homeopathy.
