

**To Australian Government**

**Department of Health**

**Therapeutics Goods Administration**

**Consultation: Options for the future regulation of 'low risk' products**

**I wish to express my very strong support for option 1 ie;**

**Option 1: leave homoeopathy as it currently is**

**(preferred option).**

**I would ask that you take into consideration the numerous cases and indisputable evidence that supports and proves the efficacy and safety of Homeopathic medicines. The multitude of people who have used homeopathic medicines for more than 200 years as a medicine of their choice with minimal adverse effects.**

**And I vehemently disagree with option 3 and 4**

**Option 3 and 4 will have a serious negative impact on the federal health budget and push the health system into further crisis.**
