

Homeopathy

To the TGA

I have used Homeopathy all of my adult life & I'm now 67

I have used it on my children when they were too young to be conscious of the placebo effect or of what they were taking. No concept of medicine is what I mean .

Homeopathy has always worked and has cured asthma ,digestives problems & the flu to name but a few incidences. It has also worked on our pets.

Just because Science has not yet worked out how it works is no reason to ban it. It does not harm either ..the hypocratic oath.

It is used widely in Europe & the UK

Please leave it alone.

Yours faithfully

Robert Harris
