Options for the future regulation of low Risk products

Homeopathic Products

I choose Option 1 or Option 2

I have used homeopathic products personally in my family with myself, my husband and my children for over 20 years and have found them to be most beneficial for a non-toxic alternative to conventional medications whose side effects worry me.

There have been no adverse effects of homeopathic products to my knowledge and I would like to be able to still use them and be able to purchase them for my own use. Alternatives to high risk medications are few and far between and Homeopathic preparations are in my opinion a good alternative to someone wanting to avoid potential toxic and high risk alternatives.

I hope that we can continue to have this choice in australia
