

12th May, 2017

Australian Government Department of Health
Therapeutic Goods Administration

To Whom it may concern,

I am writing to you share with you my points on your consultation in relation to Homeopathic produces and remedies.

I am totally concerned as to why you would want to take away this well used and well established health options from individuals. It has me concerned that there is another party at play pushing their own agenda to prevent individual living men and women having options for their own bodies. I am concerned that you will be violating human rights if you decide to go with option 4 of your consultation.

I believe that the wellness provided by homeopathy now and in the past has proven for centuries and rarely if ever has any side effects. If there are side effects that is because the body of the individual is already toxic based on the harm that the pharmaceutical industry has already placed in the body of these individuals.

I will not support the Therapeutic Goods Administration to remove my personal living woman rights to no longer have access to homeopathy if I so choose to use it.

The existing training and qualifications and what they are able to do should not be touched and should remain as they are.

There are enough living men and women that require these wellness options that you do not need to disturb and destroy what is and was given to the people to use for their well-being. If others do not choose to use this form of well-ness that is totally up to them.

I am letting you know that this is not an option and should you deny individual men and women the right to choose different well-ness options you will leave them with no human rights.

As a corporation you do not have the right to deny a living man or women their human rights to choose what is of benefit for their well-being.

I direct you to leave the homeopathy industry exactly as it is with no changes required.

Kind regards
