

To Whom It May Concern,

I am a regular consumer of homeopathic medicine and it has helped my health, my children's health, and the health of family and friends in a consistent way for the last 25 years. Without homeopathic medicine, I feel we would be bereft of the safest, easiest, most affordable way to keep ourselves healthy.

I am extremely concerned about the government's plan to change the category of homeopathic medicine. I strongly urge those in power of this issue to keep homeopathic medicine to the level 1 category, and I am completely against the level 4 category.

If number 4 category is decided upon, I would not be able to buy the essential homeopathic medicines at the chemist, or even indeed from a homeopath. This is an issue of human rights, I have the right to choose what kind of health care my family practices! I feel under considerable stress about this issue, and I ask with all my heart that these changes not be put in place, that we keep the current classification for homeopathic medicine.

Thank you so much for listening and protecting our rights.

Yours Sincerely,

Shannon Ichikawa
