Regarding Consultation Process about Homeopathic medicines:

I have extensive experience of homeopathy working for both myself and my family.
I believe that the evidence showing that it works and is without side effects to be sufficient to show that it poses no risk to public health and can be very helpful.
Therefore I strongly support option 1, I also support 2 but strongly oppose options 3 &4.

Homeopathy should be easily and freely available to all.

Warm Regards,
Elsa Luhn
