

Submission to TGA: re: Options for future regulations of low risk products (Homeopathy) 11/5/2017

To the TGA

I wish to make a submission regarding the proposed change in options to Homeopathy, low risk products.

As a very satisfied consumer of homeopathy products, I would like to see Option 1, the continuation as is,

I would like to have my choice in what type of medicine, whether complementary, or traditional. I have been

in the past a registered nurse, and have mixed very satisfactorily the use of complementary and traditional in

the care of my family and I for many years.

As an example, I have been taking a Homeopathic pain relief, with very satisfactory result.

I would be greatly disappointed if I could not continue to use it in the future.

I trust and hope that those at the TGA making this decision will make the right choice for all concerned.
