

To whom it may concern

I am writing to voice my approval and support for Homeopathy and Option 1 or 2 but my wholehearted disapproval of the proposed option 3 or 4.

I have used homeopathy treatments for a number of conditions that were found too hard for the traditional medical practitioners to get their head around without drugs upon drugs to counter the side effects caused by the side effects of the initial drugs.

I find homeopathy effective and without side effects that cause any long term side effect or discomfort.

I find it difficult to understand why the TGA would feel the need to even present option 3 or 4 for an industry that is so well understood and practiced in many overseas countries and accepted by millions of people in all walks of life.

Yours Sincerely

Bernie Ramsey
