

To whom it concerns

We are responding to the TGA's abhorrent intention to impinge on the use and availability of homeopathy.

Our family has successfully used homeopathics for a wide range of needs- from assisting my wife during birthing, with milk supplies, cuts and bruises. We have successfully used homeopathy when in the flu season and whilst travelling abroad. It is a safe, effective part of our lives and we are immensely grateful to have this in our cupboard. We have the knowledge and guidance of an incredible homeopath who understand and supports our family's needs.

We are not in favour of Option 4 – and are fed up with the concerted attacks to undermine our choices, we are conscientious objectors and value the right to choose.

We are supporting the current regulation of homeopathy and no more interference.

Nigel Verwijmeren
